SitaWare Headquarters

The operationally proven C4ISR system that offers a comprehensive tool set for commanders across domains

Experience seamless C4ISR across levels and domains
Strengthening decision-making across land, air, and maritime forces, SitaWare Headquarters enables all levels of command to coordinate operational actions.

Ensure friendly force tracking
By displaying real-time friendly force tracks, SitaWare Headquarters significantly reduces the risk of blue-on-blue and increases situational awareness.

Increase planning tempo
SitaWare Headquarters promotes planning flexibility with co-located and cross-site collaborative plans and orders, distributed directly to deployed forces.

Clear the fog of war
Fusing a wide range of data, the Joint Common Operational Picture (JCOP) reduces operational uncertainties and optmises decision-making.

Maintain communication in challenged environments
Optimised for low bandwidth and designed with intelligent prioritisation, SitaWare Headquarters ensures connectivity without disruptions.

Maximise joint and coalition interoperability
As a truly evergreen and continuously updated C4ISR solution, SitaWare Headquarters supports a multitude of military and civilian data communication standards.

SYSTEMATIC

SitaWare Headquarters – proven C4ISR for all domains

SitaWare Headquarters is the operationally proven C4ISR solution that delivers superior tactical communication, unmatched interoperability, and situational awareness across the battlespace.

Ensure coalition interoperability

Built on more than 25 years of specialised knowledge and combat-proven C4ISR experience, SitaWare Headquarters allows all levels of command to exchange vital information and extensive plans within own, coalition, and joint battle networks.

With seamless and unmatched interoperability, SitaWare Headquarters enables coalition partners to exchange crucial information. It allows commanders to receive and share friendly force tracks to reduce the risk of blue-on-blue – and to communicate other operational, intelligence, and planning information as well. As a result, it optimises mission effectiveness and enables you to utilise the full combat potential of your combined forces.

Make quick and accurate decisions

SitaWare Headquarters provides commanders with advanced C4ISR tools, allowing for fast and efficient exchange of information across the battlespace.

As part of the SitaWare suite, it offers unmatched tactical communications to support quick decision-making and shared operational awares, from the tactical to the strategical level.

With SitaWare Headquarters, commanders can plan and share relevant information with units under their command and across domains. The map-based interface visualises the Joint Common Operational Picture (JCOP) in 2D and 3D, building the Land, Maritime, and Air Pictures effectively using automatic track correlation and fusion. On top of that, SitaWare Headquarters also allows you to build and visualise function specific pictures, such as Intel, Logistic, and Fires. This enables different staff functions to tailor their Common Operational Picture (COP) view to their needs.

25+ years of experience in delivering C4ISR systems	**1m+** users worldwide
45+ SitaWare customers worldwide	**No.1** supplier of C4ISR software internationally

Integrate for a complete solution

SitaWare Headquarters increases operational flexibility with an open and extendable architecture that allows for customised extensions and integration with legacy and third party systems.

The inherent software development kit (SDK) enables you to integrate the solution with e.g. function-specific command-and-control (C2) solutions, such as Air Defence and Joint Fires. This enables you to extend the capabilities to support special needs and requirements.

As a truly evergreen commercial-of-the-shelf solution, SitaWare Headquarters continually introduces new and optimised capabilities that provide users with an operational advantage, now and into the future.

SitaWare Insight: Intelligence-supported decision-making

SitaWare Insight is the decision support tool that transforms data collection and management and provides commanders with advanced data capture and analysis capabilities. Based on the SitaWare Headquarters C4I system, SitaWare Insight is a significant enabler for the intelligence branch, operational planners, and the soldier on the ground, providing them with a holistic view of the battlefield.
