SitaWare
BattleCloud

Enhancing your
SitaWare solution with
cloud-based advantages

SYSTEMATIC

SitaWare
BattleCloud

Designed to keep the future force ahead of
the fight, SitaWare BattleCloud allows defence
forces to access data anywhere at any time
through the cloud.

As an optional cloud-based addition to the
SitaWare Suite, it extends the power of your
on-premises SitaWare installation – providing
unmatched flexibility and scalability on
the battlespace.

Why a **cloud-based complement** to the SitaWare Suite?

With a rapidly changing and increasingly complex battlespace, seamless command and control is mission-critical. SitaWare BattleCloud is a cloud-based complement to your existing on-premises SitaWare solution.

It allows you to deploy and scale SitaWare wherever you are.

It enables seamless, real-time collaboration.

And it strengthens operational effectiveness.

Key benefits of
SitaWare BattleCloud

Enhance your SitaWare Suite
with optional cloud capabilities

Incorporate SitaWare
BattleCloud as part of your
C4ISR PACE plan

Enable a world of resources,
whether at static headquarters
or the tactical edge

Collaborate seamlessly
with own and allied forces

Ensure systems
are regularly updated to
keep pace with modern
C2 technology

The SitaWare Suite - **operationally proven** and **future-ready**

Trusted by NATO and Five Eyes, Systematic's SitaWare Suite is the leading solution for advanced military communications and information systems. It provides advanced command-and-control capabilities and seamless interoperability across all domains and levels of command – and has been doing so for decades.

SitaWare BattleCloud is the latest addition. It extends the power of the SitaWare Suite with optional cloud-based infrastructure to complement on-premises installations.
