

# SitaWare Aspire

Unleash the full potential of your SitaWare solution

#### Unleash the full potential of your SitaWare solution

With the combination of digital training and hands-on exercises, SitaWare Aspire takes C4ISR training to the next level.

#### Bring down the training burden

SitaWare Aspire enables you to train your units without travel costs and coordination and to scale and adjust training as your needs develop.

#### Benefit from best practice

All SitaWare Aspire courses are developed and validated by experienced domain experts, guaranteeing realistic and relevant training of the highest quality.

#### Train as you fight

Integrating with the operational SitaWare suite, the courses in SitaWare Aspire allow you to navigate the actual user interface during training.

#### Ensure standardised and certified training

All users are guided through the same curriculum by the same digital instructor. Certifications enable measuring and monitoring of users' training levels.

#### Focus on completing courses

All courses in SitaWare Aspire are continuously updated so you can focus on completing courses, not maintaining them.

# SitaWare Aspire – streamlined learning experience

SitaWare Aspire is a digital training platform that provides you realistic, hands-on experience working with the SitaWare suite, enabling you to unleash the full potential of your SitaWare solution.

## Hands-on training in the SitaWare suite

Built on the classic e-learning environment of textual and video resources, SitaWare Aspire brings digital C4ISR training to the next level by adding an extra dimension: In-app training. The training platform has the operational SitaWare solution integrated into the training environment, offering in-app exercises, with a digital instructor supporting trainees as they learn how to use the software.

This 'train as you fight' approach provides users with experiences that reflect real-life scenarios – and delivers faster and more efficient learning outcomes. As a result, users develop their C4ISR skill set hands-on, navigating the operational SitaWare interface.

## Amplify cooperation

In SitaWare Aspire, the inherent digital instructor provides everyone with the same curriculum, explanations, and exercises, offering a standardised approach and strong foundation for further development and learning. Whenever a trainee completes one of the courses, they receive a certificate that proves that they have met the training targets. A concrete token of their C4ISR skillsets – and a key to enhancing cooperation.

## Boost operational tempo

Developed on the basis of best practices from domain experts with years of operational experience, SitaWare Aspire guarantees that your troops are trained in realistic scenarios that accurately reflect actual workflows.

*The combination of watching what to do first and having your own go afterwards enables the trainees to link theory and explanations with hands-on experience. A mix that strengthens how they understand and use the C4I solution.*

G35 Future Operations, 1st Brigade, Danish Army

To make the exercises as realistic and relevant as possible, SitaWare Aspire allows your trainees to work hands-on during their training with the actual SitaWare solution they will be using in real-life operations. The courses in SitaWare Aspire are accessible at any time and place, including barracks or national defence networks. This flexibility allows you to maximise your C4ISR capabilities and boost your operational tempo.

## Maximise training outcomes

With SitaWare Aspire, you can bring the training burden down – and the efficiency up. As a digital training platform, SitaWare Aspire allows you to train your units without the cost and coordination efforts of travelling. With the flexibility of SitaWare Aspire, you can scale and adjust training as your needs develop, allowing you to meet future demands as well. The digital platform is easy to implement and use – keeping C4ISR training expenses and administration at minimum.

### Want to know more?

We are more than happy to tell you all there is to know about SitaWare Aspire, including offering a demo of the system. Please contact your local Systematic partner to set up a meeting.
