

SitaWare Insight + JANES

Combining leading AI-supported decision-making with the world's largest collection of verified and validated open-source defence intelligence.

Gain an advantage through AI-supported decision-making

SitaWare Insight offers advanced decision support based on data collection, storage, and analysis.

Improve your situational awareness with assured OSINT data

Access Janes interconnected data to understand the capabilities of your opponents to secure your advantage on the battlefield.

Benefit from a verified, secure data source

Access foundational data that is verified, and validated by experts, using a rigorous tradecraft process, to deliver military OSINT that you can trust.

Manage the full intelligence cycle

SitaWare Insight provides complete management of the Intelligence Requirement Management & Collection Management (IRM & CM) process.

Delivering intelligence advantage

Combine intelligence products, the common intelligence picture and the fully-integrated Janes data within Insight to gain the ultimate understanding of the battlespace.

Protect sensitive information

By defining specific user groups, SitaWare Insight allows you to manage data access within the system and control external dissemination of information.

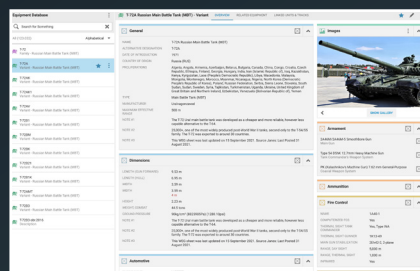

SitaWare Insight is the decision support tool that transforms data collection and management, with Janes interconnected data providing unrivalled, easily accessible, OSINT.

“Operational planners are fully dependent on information from the intelligence community. The addition of the Janes OSINT capabilities to SitaWare Insight makes for an unparalleled intelligence picture.”

Henrik Sommer

SitaWare Insight Product Manager
and Domain Expert, Systematic Defence

A Fully Integrated Intelligence Solution

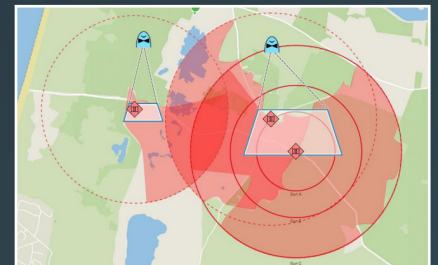

Seamless Integration: SitaWare Insight integrates with the SitaWare Headquarters C4I system, enhancing intelligence requirements management (IRM) and collection management (CM) for over 50 customers worldwide.

Data Utilisation: It leverages military data lakes (sensor data, images, videos, documents) for secure cloud storage and AI-powered search, enabling precise data retrieval.

Integrate with a Trusted OSINT Source

Open-Source Intelligence (OSINT): SitaWare Insight integrates structured data from Janes, providing reliable OSINT for military operations.

Trusted Data: Ensures commanders and analysts receive up-to-date, verifiable information on equipment, weapons, and more.

Scalable Intelligence Solution with the Latest Datasets

Scalable Architecture: The cloud-native design ensures secure data management and sharing at various classification levels.

Regular Updates: With regularly updated OSINT from Janes, users receive the latest, trustworthy data for mission-critical decisions.
