

SYSTEMATIC **COLUMNA**

Clinical Logistics

Placing efficient delivery
of patient care front and center

Columna Clinical Logistics provides clinical staff with continuous at-a-glance, real-time situational awareness. Touch screen displays enable effortless orchestration of time critical tasks for quick response.

Columna Clinical Logistics can provide exceptional ROI. Results have been verified through multiple independent third-party case studies:

- **25% increased efficiency**
- **reduced patient waiting time**
- **more satisfying patient experience**
- **significantly less staff interruptions**
- **Better patient flow**

Columna Clinical Logistics is an innovative system created by human-computer interaction experts and experienced clinical staff. The result is a unique and intuitive user interface with clear and actionable indicators, designed to fit the workflow in a healthcare provider environment as opposed to how IT is typically used in an office setting.

Columna Clinical Logistics augments your existing information systems to provide staff with real-time patient data and current information for easy coordination and timely management of patient care.

Columna Clinical Logistics - Emergency

SYSTEMATIC

SYSTEMATIC COLUMNNA Clinical Logistics

Columnna Clinical Logistics is deployed to large touch screen displays at strategic locations throughout the department. Each screen is customized and optimized to the requirements and needs of each location. Contents may also be viewed and updated from tablets, mobile devices and stationary PCs.

Notifications and chat communication can be sent to DECT phones, cell phones and pagers. Columnna Clinical Logistics integrates seamlessly with other healthcare applications and information systems using HL7 and other industry standards.

Placing efficient delivery of patient care front and center

Patient overview

At-a-glance view of concise, comprehensive patient information, including lists of incoming patients, waiting room patients, and patients in treatment areas.

Patient treatment plans

Stay ahead of patient examinations, radiology and lab results with real-time status indicators and updates.

Resource overview

See your department's available resources and get a status update on vacant beds or staff location and activities

Information sharing

Eliminate and avoid interruptive phone calls to staff by sharing information through electronic messages and digital notes.
