Service Logistics

Benefits

- Increased patient safety
- Greater efficiency
- Better overview of tasks, equipment and personnel
- Increased employee satisfaction
- Greater patient satisfaction
- Optimised planning and control over resources
- Financial savings

An improvement of the basic service functions will have a positive effect on the efficiency of the entire hospital

Supporting service personnel with IT optimises hospital logistics

Complete overview

Columna Service Logistics is a solution that supports the procedures of hospital service personnel and optimises hospital logistics. **Service personnel are central to the daily flow of a hospital.** Service personnel include orderlies, bed movers, cleaning personnel and warehouse operatives.

Basically, the solution **tracks all of the allocated people, equipment and tasks**, which can then be used for coordination of activities. An overview is created by tracking selected items, which can be used to optimise logistics and improve the quality of service.

Columna Service Logistics contains a series of applications, each designed to solve central logistics challenges. They are **user-friendly and easily accessible** and are based on relevant user situations in hospitals.

The applications function via PCs, smartphones and tablets and can be used on their own or as an integrated part of logistics.

Applications

TASK MANAGEMENT

- Clear overview of work orders and resources enables better planning
- Increased productivity

TRANSPORT MANAGEMENT

- Real-time overview of location of drivers, tasks, capacity, etc.
- Easier for the coordinator to allocate tasks and ensure that urgent transport needs are handled quickly

BED MANAGEMENT

- Complete overview of hospital beds
- Certainty that beds meet the required hygiene standards
- More efficient work flow in cleaning station and wards

TROLLEY MANAGEMENT

- Overview of trolley locations across the hospital
- Less waiting time for service personnel

GENERAL SEARCH

- Collects data and information and makes it manageable
- A user-friendly interface and search engine means personnel can track other personnel and equipment and see the current locations

CLEANING MANAGEMENT

- Overview of all types of tasks
- Flexible scheduler
- Better utilisation of capacity
