

SYSTEMATIC **COLUMNA**

Mobile

Mobile access to patient
records improves work flow
and leads to higher efficiency

SYSTEMATIC

Access to patient records whenever you need it with Columna Mobile

Challenges

The current situation brings forth a number of challenges.

- Lack of overview
- A lot of interruptions
- Delays in data sharing
- Redundant documentation
- Outdated patient overview prints

Solution

Columna Mobile is a configurable and user-friendly solution that focuses on individual needs. Main features:

- View laboratory results
- Notification of new laboratory results of interest
- View and search in patient records
- Access data of any patient from lists of patients related to ward, personal favorite lists or camera to scan barcode on patient bracelet
- Create new structured entries in patient record, like EWS (Early Warning Score)
- View and update big screen ward logistics, ie. change patient status, bed, remarks, working diagnosis etc. Changes are immediately visible on big screens in the ward

Advantages using Columna Mobile

Clinical staff

- Clear up-to-date patient overview
- No redundant information
- Less time spent for transportation between patients and office
- Faster reacting in acute situations
- Data entry near patient
- Updated data always available on a personal mobil unit

Patient

- Well informed patients
- Fast answer on questions
- High experienced quality of treatment
- More time with clinical staff

Improving
workflow

Saving time

Increasing
efficiency
